

Civil Engineer / Ground Engineer for turnkey properties

MSCP / Industrial / Residential / Office Buildings

City: Birmingham

Job-ID: 8822

A wide range of duties for you

- // Project-oriented development of subsoil and foundation concepts
- // Selection, acquisition and control of external partners (design offices)
- // Coordination with special purpose associations, authorities and internal project teams
- // Preparation and participation in the awarding of civil engineering services to subcontractors
- // Advisory support for the sales and project team
- // Carrying out earth static calculations and Coordination of the static system with the subsoil
- // Tendering, award preparation as well as coordination and support of special foundation and special civil engineering measures

As a team with our civil engineering, environmental and foundation engineering experts, you will design and support demanding projects in the area of property drainage and outdoor facilities. You are the central specialist and contact person for our regional branches and advise them from the creation of the concept to acceptance.

Your individual profile

- // Successfully completed studies in the field of civil engineering or other relevant areas
- // Well-founded experience in CAD-supported designing of property drainage systems and traffic areas
- // Great interest in design issues and interdisciplinary solutions in ground engineering
- // Ability to develop designs in CAD is essential
- // Demonstrable knowledge of design, construction techniques, technical requirements and construction regulations
- // Strong communication skills, high customer orientation and persuasiveness
- // Ability to work in a team and enjoy acting independently and entrepreneurially

Would you like to join our team? We look forward to welcoming you to our team!
