

## React / TypeScript Developer (m/f/d) for Smart Building

City: Bielefeld, Cologne (Centrum)

Job-ID: 9430

### A wide range of duties for you

- // Development of our web and mobile apps as a member of one of our cross-functional Scrum teams
- // Close collaboration with requirements engineers and usability experts
- // Solving technical and conceptual challenges and contributing to the continuous improvement of methods and tools in our quality-driven development
- // Selecting future-oriented components and regularly reviewing the technologies used
- // Supporting the long-term development of our product

### Your individual profile

- // Completed IT studies or IT training with several years of experience in the development of responsive web and/or mobile apps
- // Knowledge of current web technologies and frameworks, especially React and TypeScript
- // Confident mastery of architecture standards and best practices, such as design patterns
- // Experience in an agile project environment and with agile development methodologies
- // Strong awareness of software ergonomics and quality, as well as user experience
- // Advanced analytical and communication skills, as well as team spirit
- // Excellent English skills, both written and spoken

### About GOLDBECK

GOLDBECK realizes pioneering real estate projects in Europe. We perceive buildings as products and offer all services from a single source: from design to construction to services and operating the buildings. Currently, our family-owned company employs more than 12,500 people at over 100 locations, with a total volume of over 6 billion euros. Our claim "building excellence" stands for top performance in planning, construction, and operation, as well as the development of our talents - including future viability.

Through more advanced building technology, combined with sensors and automation systems, new opportunities and challenges arise around real estate. While new digital applications for various target groups can be realized on the one hand, a highly efficient, digitally supported building operation must take place on the other. GOLDBECK addresses these topics related to the collection, storage, evaluation of building data, and

### Quite interesting?

Then please complete your application online and address to Mr. Mandel.
