- // Knowledge of current web technologies and frameworks, especially React and TypeScript
- // Proficient in architectural standards and best practices, such as design patterns
- // Strong analytical and communication skills, as well as team spirit
- // Excellent written and spoken English skills

About GOLDBECK

GOLDBECK realizes pioneering real estate projects in Europe. We perceive buildings as products and offer all services from a single source: from design to construction to services and operating the buildings. Currently, our family-owned company employs more than 12,500 people at over 100 locations, with a total volume of over 6 billion euros. Our claim "building excellence" stands for top performance in planning, construction, and operation, as well as the development of our talents - including future viability.

Through more advanced building technology, combined with sensors and automation systems, new opportunities and challenges arise around real estate. While new digital applications for various target groups can be realized on the one hand, a highly efficient, digitally supported building operation must take place on the other. GOLDBECK addresses these topics related to the collection, storage, evaluation of building data, and

Quite interesting?
