## Press Release

### **GOLDBECK and ORANMORE PRECAST set benchmark for localised industrial production with new partnership**

**GOLDBECK, a leading European specialist in systemised construction, has announced a strategic manufacturing partnership with ORANMORE PRECAST to produce precast concrete slabs for its multi-storey car park projects (MSCPs) across the United Kingdom. This marks a significant milestone for GOLDBECK and its UK growth strategy, enabling the company to localise production of key system components for the first time.**

The slabs are an essential part of GOLDBECK's systemised construction method – a process based on industrially manufactured system elements, which are then transported and assembled on-site. This approach ensures improved sustainability, delivering consistent quality, reducing waste and improving delivery times.

Equally as important, this new partnership will enable the company to replicate its rigorous production and quality control standards while manufacturing within the UK, in Lound, Nottinghamshire, at a purpose-built facility for GOLDBECK on the ORANMORE PRECAST site. The partnership strengthens GOLDBECK's network of production facilities across Europe.

"This partnership with ORANMORE PRECAST represents a major step forward for GOLDBECK in the UK," said Craig Davies, UK Managing Director. "Having been established here for over two decades, consistently delivering high-quality buildings manufactured precisely to the needs of each customer, we are incredibly excited to begin local production of our system components in this country. This move significantly strengthens our commitment to the UK market, aligning with our vision for building excellence."

The decision to partner with a UK manufacturer, also confirms GOLDBECK's dedication to sustainability, a move that reduces transportation, thereby contributing

to a lower carbon footprint. This means that for the immediate future, the company's plans will be focussed on incorporating ORANMORE's precast car park slabs into all its UK MSCP projects.

"We are proud to mark a significant milestone in our partnership with GOLDBECK with the completion of a purpose-built fully automated carousel plant dedicated to the production of their premium car park slabs," said Ross Melville and Richard Burke, Joint Managing Directors at ORANMORE PRECAST. "This achievement reflects over 12 months of close collaboration between both teams, working together with a shared focus on efficiency, quality and sustainability."

In broader terms, the partnership represents a long-term investment in the UK's construction infrastructure, aligning with GOLDBECK's vision for scalable, systemised building solutions that combine quality, sustainability and efficiency. As ORANMORE PRECAST's dedicated manufacturing facility in Nottinghamshire has recently gone live, the collaboration also sets a new benchmark for localised industrial production and positions both companies at the forefront of innovation in UK construction.

## **About GOLDBECK**

GOLDBECK builds future-oriented buildings across Europe. The company regards buildings as products, which it delivers efficiently by serving as a one-stop shop: from design and construction to services during operation. In line with the aspiration "building excellence", the family-owned company carries out real estate projects fast, sustainably and cost-effectively, with a perfectly fitting functionality.

GOLDBECK is a partner for medium-sized and large companies, investors, project developers and public-sector clients. The company's range of services includes warehouses and factories, multi-storey car parks, office and school buildings, sports halls, fire stations and residential buildings. Refurbishment and expansion of existing buildings, as well as building-related services complete the Goldbeck spectrum.

In the financial year 2023/2024, GOLDBECK completed 510 projects throughout Europe with a total output of 6.4 billion euros. Currently the company employs about 13,000 personnel at more than 100 locations across Europe.

GOLDBECK set up its UK operations in 2002 and has since grown into a team of 80 people across four regional offices in Birmingham, Cardiff, London, and Manchester. In 2025, the company launched its first UK production through an exclusive partnership with a concrete slab manufacturing facility in Nottinghamshire.

## About ORANMORE PRECAST:

ORANMORE PRECAST is a leading UK manufacturer of high-quality precast concrete solutions, known for its innovation, precision engineering, and ability to deliver complex projects at scale. Established in 2011 and headquartered in Brandon, Weeting, the company has grown into a trusted partner for major clients across the construction, infrastructure, and civil engineering sectors. With the opening of a second manufacturing site in Lound in 2019, Oranmore expanded its geographic reach and increased its production capacity, continuing to set the standard in precast manufacturing.
